

Table

Tables are a nice way to organize a lot of data. We provide a few utility classes to help you style your table as easily as possible. In addition, to improve mobile experience, all tables on mobile-screen widths are centered automatically.

Name	Item Name	Item Price
Alvin	Eclair	0.17
Alvin	Chocolate	1.14
Alvin	Jellybeans	0.98

Striped Table

Add class+"striped" to the table tag for striped table

Name	Item Name	Item Price

Add class+"responsive-table" to the table tag for centered table

Name	Item Name	Item Price
Alvin	Eclair	0.17
Alvin	Chocolate	1.14
Alvin	Jellybeans	0.98

Media CSS

Images

Images can be styled in different ways using Materialize

Responsive Images

To make images resize responsively to page width, you can add the class responsive-img to your image tag. It will now have a max-width: 100% and height:auto.

Circular images

This is a square image. Add the "circle" class to it to make it appear circular.

To make images appear circular, simply add class="circle" to them

Videos

We provide a container for Embedded Videos that resizes them responsively.

Responsive Embeds

To make your embeds responsive, merely wrap them with a containing div which has the class video-container
