

Navbar

The navbar is fully contained by an HTML5 Nav tag. Inside a recommended container div, there are 2 main parts of the navbar. A logo or brand link, and the navigations links. You can align these links to the left or right.

Right Aligned Text

To right align your navbar links, just add a right class to your <'ul> that contains them.

Left Aligned Text

To left align your navbar links, just add a left class to your <'ul> that contains them.

Centering the Logo

The logo will center itself on medium and down screens, but if you want the logo to always be centered, add the center class to your . You will have to make sure yourself that links do not overlap if you use this.

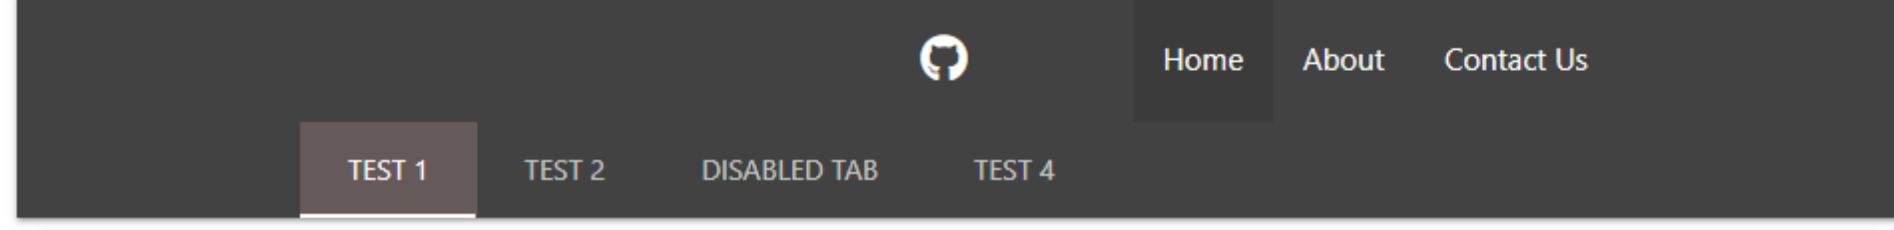

Active Items

Add active class to your li tags to denote the current page.

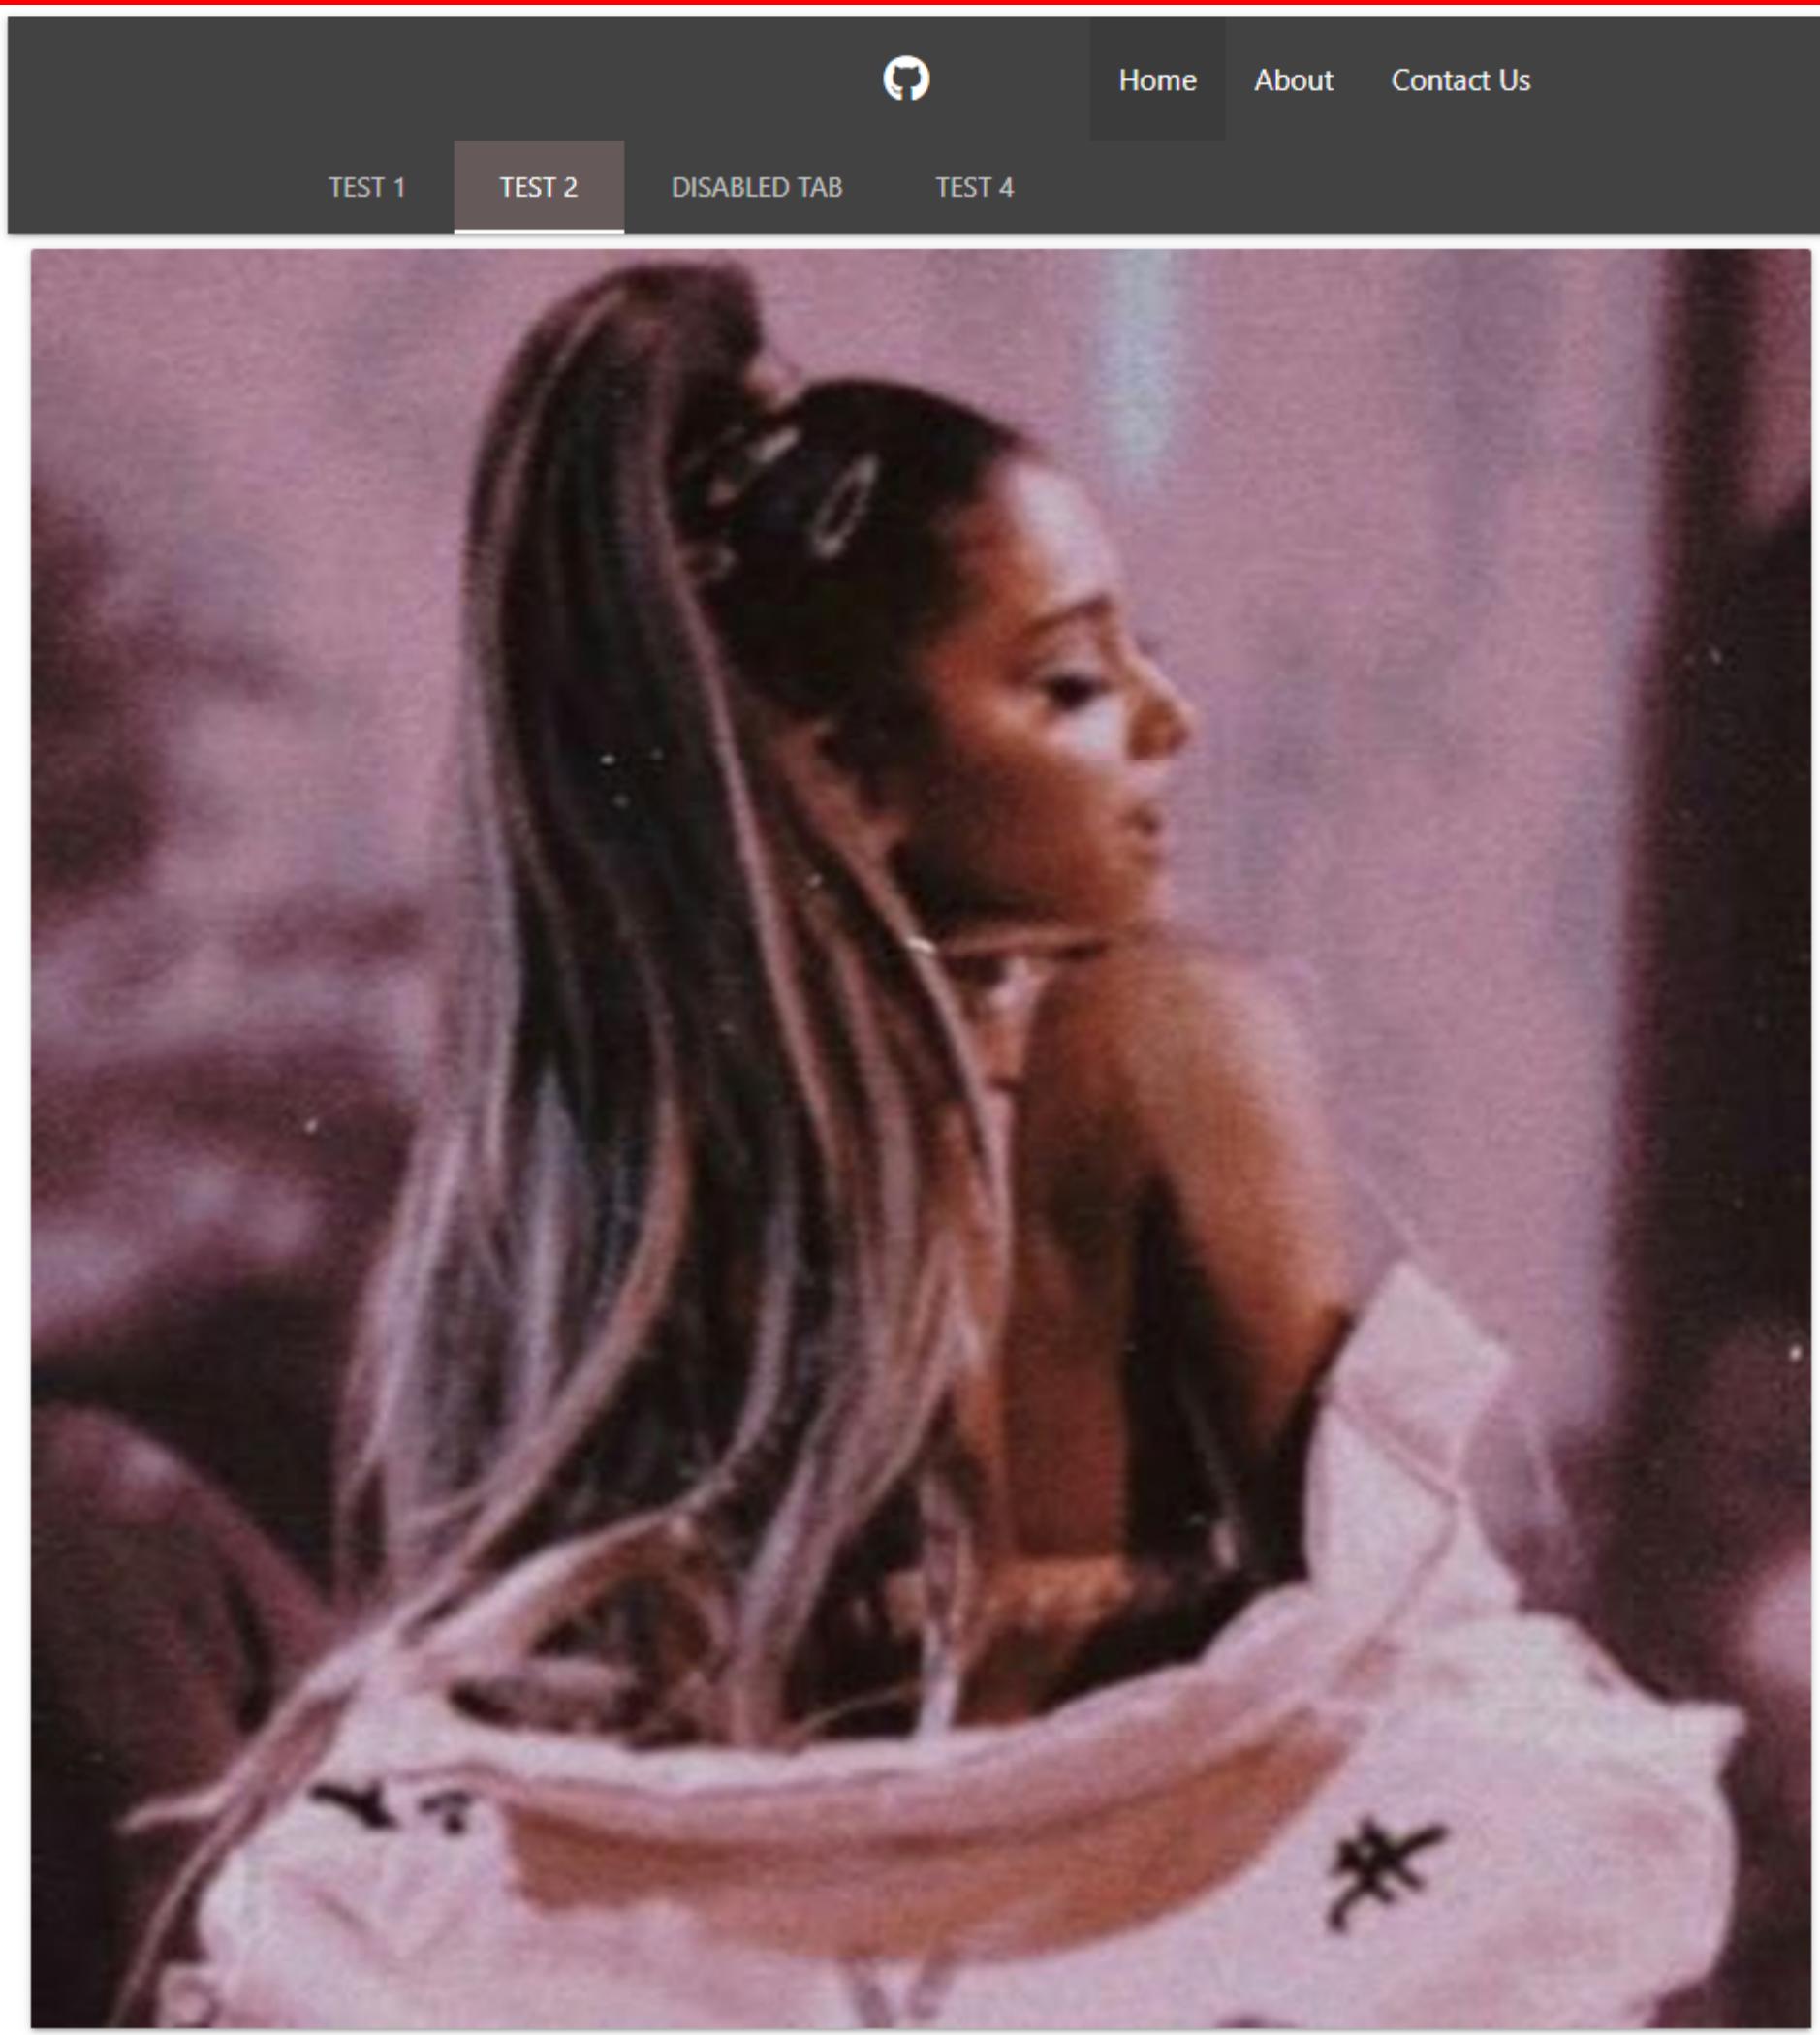

Extended Navbar with Tabs

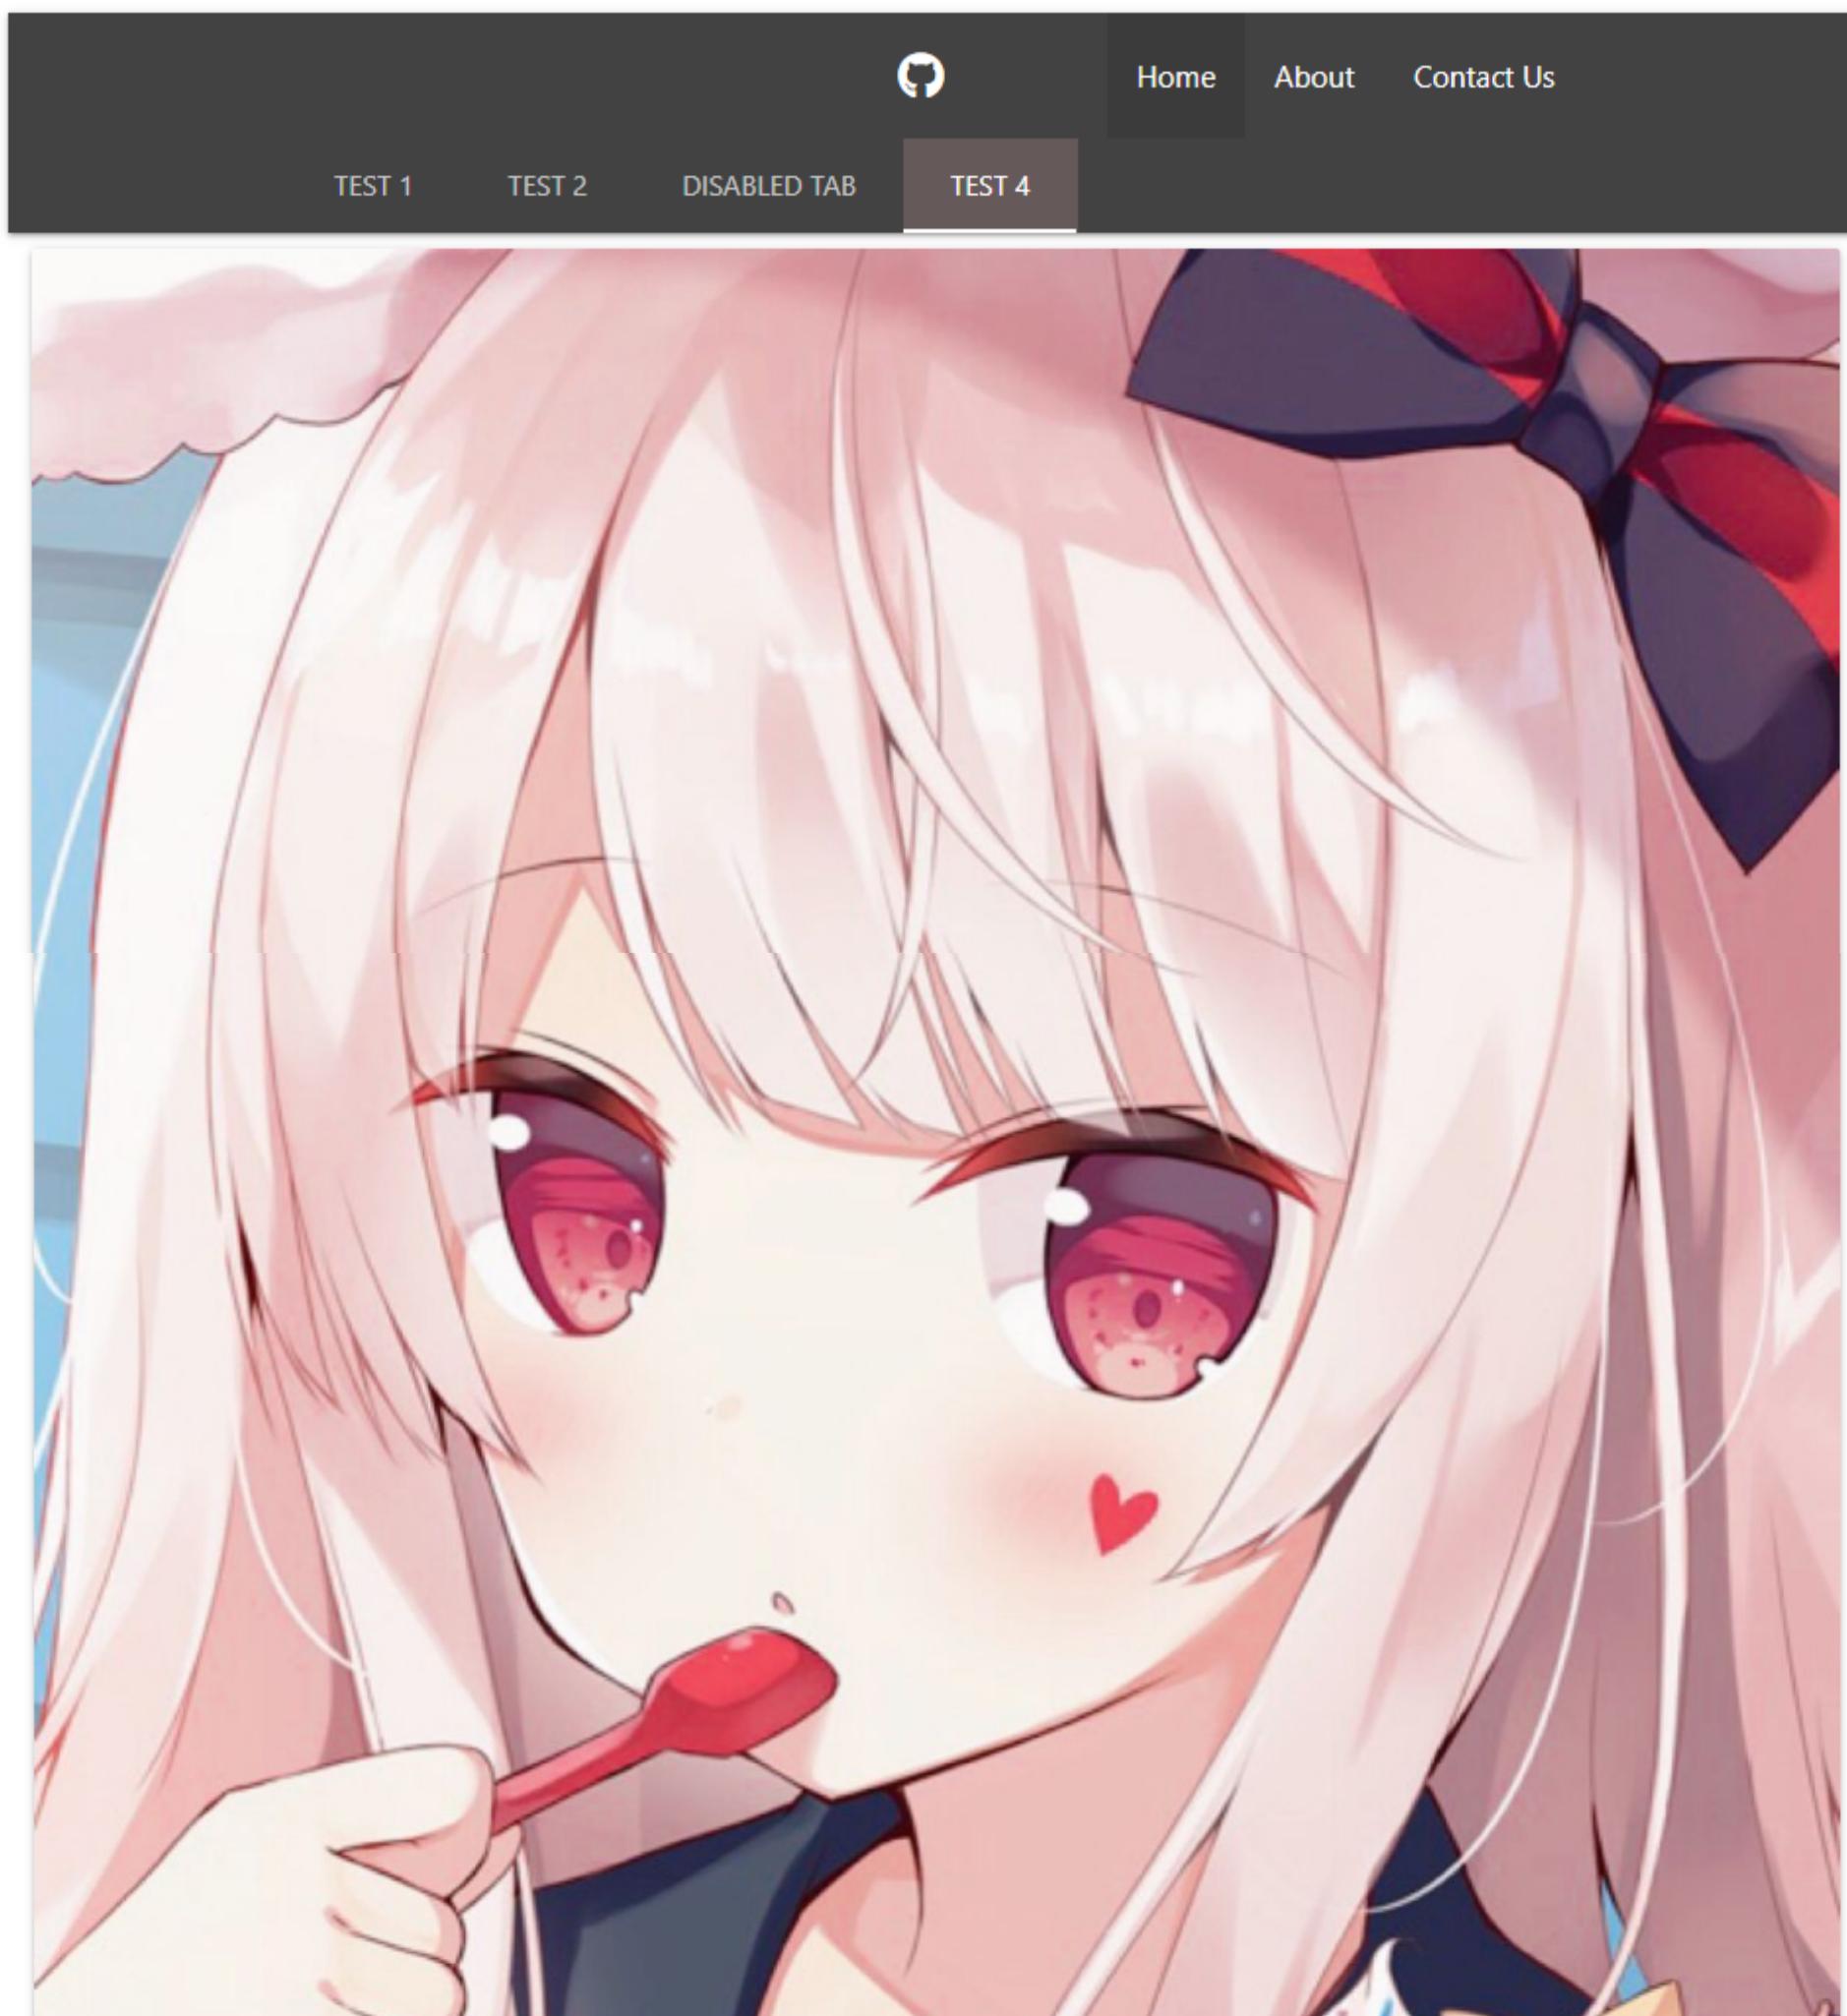

To add extended components to the navbar, add the class nav-extended to the outer nav tag. This will allow your navbar height to be variable. Then you can just include a tabs component inside the nav-wrapper.

Fixed Navbar

To make the navbar fixed, you have to add an outer wrapping div with the class navbar-fixed. This will offset your other content while making your nav fixed. You can adjust the height of this outer div to change how much offset is on your content.

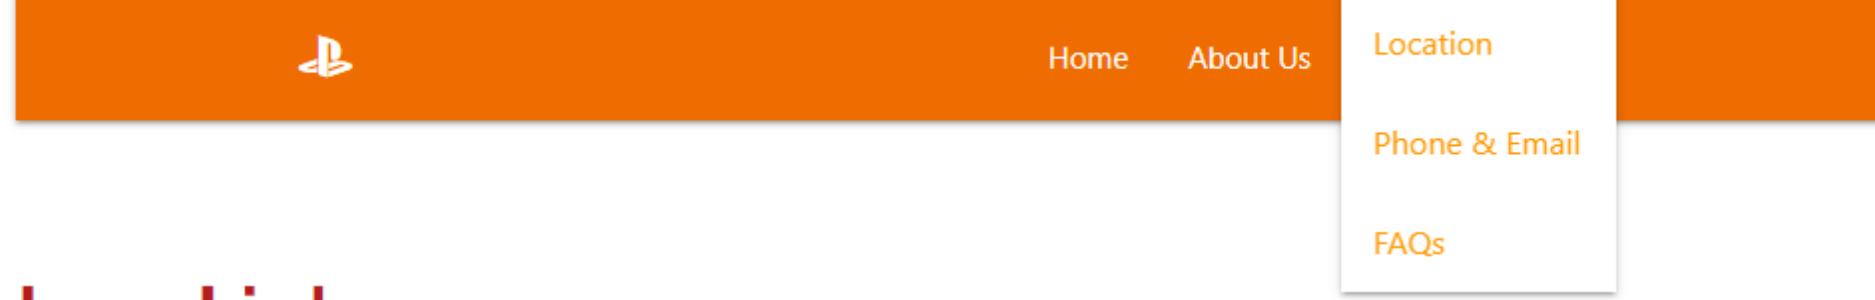

Navbar Dropdown Menu

To add a navbar dropdown menu, add the ul dropdown structure into the page. Then, add an element to trigger the dropdown menu. Make sure to supply the id of the dropdown structure to the data-target attribute of the dropdown trigger.

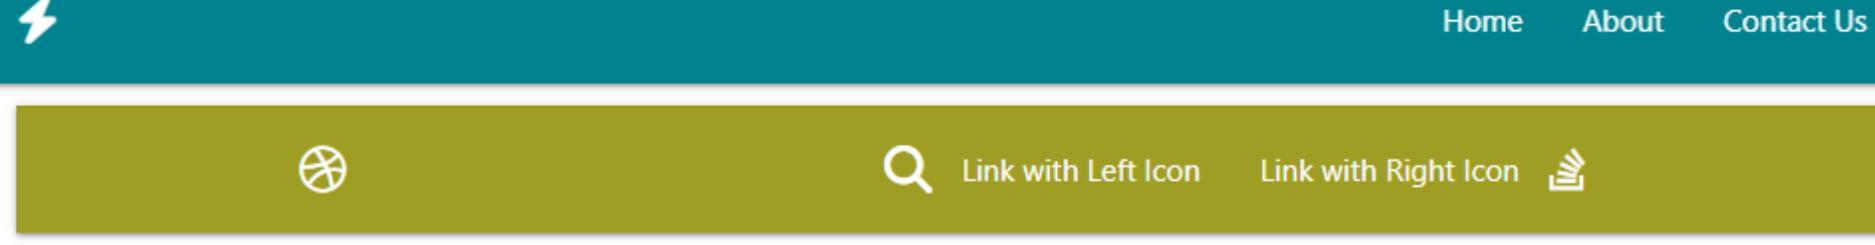

Navbar Dropdown Menu

To add a navbar dropdown menu, add the ul dropdown structure into the page. Then, add an element to trigger the dropdown menu. Make sure to supply the id of the dropdown structure to the data-target attribute of the dropdown trigger.

Icon Links

You can add icons into links. For icon only links you don't need any additional class. Just pop the i tag in and it will work.

You can add icons into links. For icon only links you don't need any additional class. Just pop the i tag in and it will work.

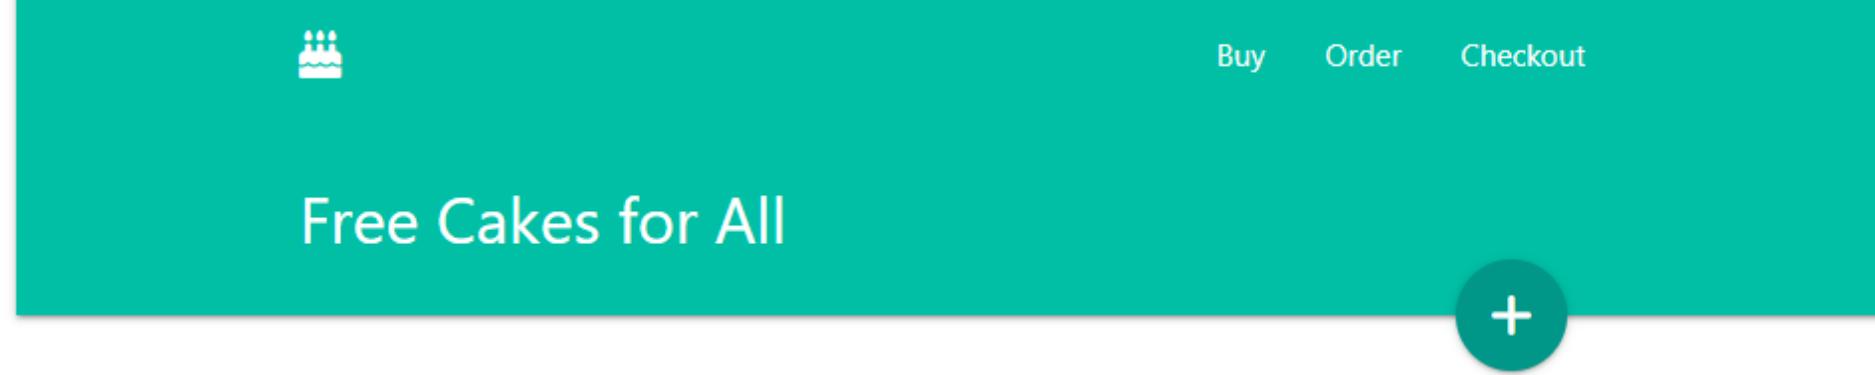

Buttons

You can add buttons into links. For buttons you don't need any additional class. Just pop the .btn class on the a tag.

Halfway FAB in Extended Navbar

Add a halfway FAB to your extended navbar.

Search Bar

You can add a search form in the navbar.
